ahmed — Comprehensive Analysis Report

Generated: 2025-12-07 15:40:32

Executive Summary

Overall Health: 66% (Grade D)

This comprehensive analysis evaluates ahmed across all major vehicle subsystems including engine, transmission, cooling, electrical, and fuel systems. The AI analysis indicates the vehicle is in **Fair** condition.

Vehicle Information

Field	Value
Vehicle Name	ahmed
Make	Nissan
Model	Patrol Y62
Year	2017
VIN	
License Plate	777777

Technical Specifications

Specification	Value
Engine Type	
Transmission	
Fuel Type	
Drivetrain	

Usage Statistics

Metric	Value
--------	-------

Total Distance	0 km
Total Driving Hours	0.0 hrs
Trip Count	0
Maintenance Count	0

■ AI Health Analysis

Overall Health Grade: D
Status: Fair (66%)

Subsystem Health Breakdown

Subsystem	Score	Status	Trend
Engine	63%	Fair	—
Cooling	90%	Excellent	—
Electrical	50%	Poor	—
Fuel System	59%	Fair	—
Transmission	65%	Fair	—

Risk Assessment

Assessment	Value
Current Risk Level	LOW
Active Alerts	0

Data Quality	80%
--------------	-----

■ OBD Sensor Snapshot

Engine Parameters

Sensor	Value	Unit	Normal Range	Status
RPM	0.0	RPM	600-6500	■
Engine Load	0.0	%	0-100	✓

Temperature

Sensor	Value	Unit	Normal Range	Status
Coolant Temp	85	°C	60-110	✓
Intake Temp	59	°C	-40-80	✓

Fuel System

Sensor	Value	Unit	Normal Range	Status
MAF	1.9	g/s	0-500	✓
MAP	2	kPa	10-105	■

Vehicle

Sensor	Value	Unit	Normal Range	Status
Speed	0.0	km/h	0-250	✓

■ Failure Predictions

Insufficient data for failure predictions. Continue collecting sensor data for accurate forecasting.

■ Historical Trends

■ PID Coverage Summary

Category	Count	Status
Total PIDs Available	10	✓
Standard Mode 01 PIDs	7/13	■
Custom/Mode 22 PIDs	—	—

Available Sensors

_timestamp, coolant_temp, engine_load, intake_temp, maf, map, rpm, speed, throttle_position, timestamp

■ AI Recommendations

Maintenance Priorities

Priority	Recommendation
HIGH	Electrical system needs attention (Score: 50%). Check battery and alternator.
HIGH	Fuel system issues detected (Score: 59%). Check fuel filter and injectors.

General Maintenance Guidelines

- Monitor coolant and oil temperatures regularly
- Check battery voltage, especially before long trips
- Address any check engine lights promptly
- Follow manufacturer service intervals
- Keep fuel system clean with quality fuel

■ Maintenance History

Metric	Value
Total Maintenance Records	0
